Problem Statement

Lack of a structured platform to showcase individual skills and projects.

Traditional resumes are text-heavy and not interactive.

Recruiters need a quick and engaging way to evaluate candidates

A personal portfolio provides a modern and professional solution.

Project Overview

Development of a personal portfolio website.

Built using HTML, CSS, and JavaScript.

Responsive design for mobile, tablet, and desktop

Includes About Me, Projects, Skills, and Contact sections.

End Users

Students / Freshers showcasing their academic projects

Job seekers applying for internships and jobs

Freelancers presenting their work to potential clients.

Employers / Recruiters evaluating candidates' skills

Tools and Techniques

HTML5 → Structure and content.

CSS3 → Styling, layout, and animations.

JavaScript → Interactivity and dynamic content.

Responsive Design → Media queries for multi-device support.

Version Control (GitHub) → Code management & deployment.

Portfolio Design and Layout

Dark theme UI for modern look.

Hero Section → Profile image, introduction, call-to-action buttons.

Contact Section → Easy communication (form, links, email).

About Section → Skills, expertise, and description.

Projects Section → Showcasing completed works with details.

Features and Functionality

Interactive navigation with smooth scrolling.

Responsive cards for project display.

Animations & hover effects for better engagement.

Contact button linked to email/social media.

Lightweight and fast-loading pages.

Results and Screenshot

Successfully deployed portfolio website.

Clean and user-friendly UI.

Professional look that strengthens personal branding.

Screenshot examples: Homepage, About, Projects, Contact page.

Conclusion

Portfolio website helps in professional self-branding.

Replaces static resumes with interactive presentation.

Easily customizable for future updates.

Valuable tool for career opportunities and freelancing.
